Suggestions for improvement

6 responses

Improve text styles

Please reduce amount for the food for which I can afford.

need more clarity

Colour combination could be better

Great app with useful features....btt adding more customization options would improve user experience.....!

The allignment could be bit centralized

THANKYOU!

Suggestion 1 — Better text style
We changed the fonts to make it look cleaner and more modern. Headings now use *Nunito* (bold and clear), and normal text uses *Lato*, so everything like titles, descriptions, and prices is easier to read and well organized.

Suggestion 2 — Improve clarity
We made everything easier to understand. Each item now has a proper description, the order tracker shows clear steps with exact time updates, and the delivery time (ETA) is shown clearly so users know what to expect.

Suggestion 3 — Better color combination
We improved the color theme to make it more pleasant. Instead of only orange, we now use a warm red-orange (#E8420C), green for success or budget deals, and amber for ratings. This gives a balanced and consistent look.

Suggestion 4 — More customization options
Now users can customize their food easily. Each item has a “Customize” button where they can choose size, crust, spice level, sweetness, or toppings through a simple bottom sheet menu.

Suggestion 5 — Better alignment and layout
We fixed the layout so everything looks neat and centered. The main banner, category section, navigation bar, and headings are all properly aligned with equal spacing, making the app look clean and well structured.
