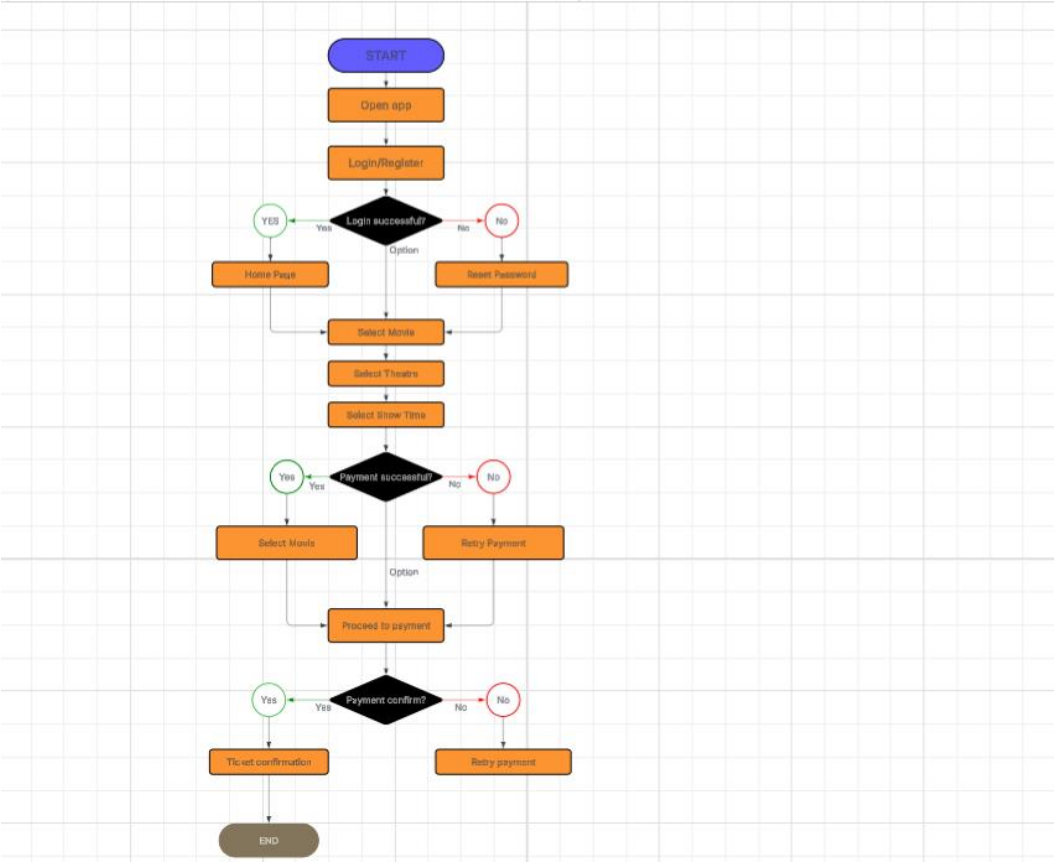
# EXPERIMENT 5

NAME: KANISHKA S REG NO:240701227

5. Conduct task analysis for an app and document user flows. Create corresponding wireframes using Lucidchart



**Task Analysis Flow Diagram**

Task analysis describes the sequence of steps a user follows to complete a task in the application.In the movie booking system, the task analysis flow diagram represents the process from opening the application to successfully booking a movie ticket.

The process begins when the user opens the application and browses available movies. The user then selects a movie and views its details such as rating, description, and show timings. After choosing the preferred theatre and show time, the user proceeds to select seats. Once the seats are confirmed, the user moves to the payment section to complete the transaction. After successful payment, the system displays a booking confirmation with ticket details.

The task analysis flow helps designers understand user interaction and ensures that the system provides a smooth and logical workflow.

**Wireframe Design**

A wireframe is a basic layout used to represent the structure of an application before developing the final interface. It shows the placement of elements such as buttons, text fields, images, and navigation options.In this project, wireframes were designed for the main screens of the Movie Booking Application.

**Login Page**

The login page allows the user to enter their username and password to access the system. It contains input fields for user credentials and a login button to authenticate the user.

**Movie Details Page**

The movie details page displays information about the selected movie, including the movie title, rating, description, and show details. This screen helps the user understand the movie before booking tickets.

**Seat Selection Page**

The seat selection screen displays the theatre seating arrangement. Users can view available seats and select their preferred seats for the movie show.

**Ticket Screen**

The ticket screen displays the booking confirmation after seat selection. It shows details such as movie name, selected seat numbers, show time, and ticket confirmation message.
