EXPERIMENT 6

NAME:KANISHKA S ROLLNO:240701227

6.Stimulate the lifecycle stages for UI design using RAD model and develop a small interactive interface.

1. Requirements Planning

In this stage, the needs of users are identified. The system requirements are collected by understanding user problems and expectations.

2. User Design

In this stage, user-friendly interfaces are designed using wireframes and prototypes. The focus is on simplicity, clarity, and ease of use.

3. Rapid Construction

In this stage, the designed interface is converted into a working model by adding interactions such as button actions and navigation.

4. Test with User

In this stage, the system is tested with users, errors are corrected, and the final version is prepared for use.
